(AD) $\angle B_1 = \alpha = \angle C_1$ (no) $\cdot 10$

(AD) $\angle E_1 = 90 - \alpha = \angle E_2$

$\angle E_3 = 90 - \angle E_2 = \alpha$

(ODEC) $\angle D_1 + \angle E_2 + \angle E_3 + \angle C_1 = 180$

$\angle D_1 + 90 - \alpha + \alpha + \alpha = 180$

$\angle D_1 = 90 - \alpha$

$\rightarrow \boxed{\angle D_1 = \angle E_1}$

$\angle C = \angle M \Leftrightarrow \angle M = \angle C \Leftrightarrow \angle E_3 = \angle C_1$ (AD) $\cdot 10$
 $\angle M = \angle D \Leftrightarrow \angle E_2 = \angle D_1$

(AD) $\angle D_1 = 30^\circ \Rightarrow \angle B_1 = 60^\circ$ (no)

$BE = 2$
 $AE = \sqrt{2}$

(30, 60, 90) (AD)
 (no)

(AD) $DE = \sqrt{2}$

$4x^2 = x^2 + 52$
 $x = \sqrt{\frac{52}{3}}$

$DM = \frac{1}{2} DC = x = \sqrt{\frac{52}{3}}$
