$$T_5 = \binom{n}{4} \times \frac{n-4}{3} \times^{-4} \rightarrow \frac{n}{3} - \frac{4}{3} - 4 = 0 \rightarrow \boxed{n=16}$$

$$T_9 = \binom{16}{8} \times \frac{16-8}{3} \times^{-8} = \frac{16!}{8!8!} \times \frac{8}{3} \times^{-8}$$

შედეგად მიიღება 17-ე
